

Limited One-Year Warranty For Anodized Finish

Concord American Flagpole (“CAFP”) warrants to the first purchaser (“Buyer”) of a CAFP aluminum flagpole that the anodized finish (*the “Finish”*) on the flagpole will, upon shipment by CAFP, be free from defects in material and workmanship (*the “Warranty”*).

If the Finish exhibits any excessive fading due to normal climatic exposure, and written notice of such failure is given to CAFP within one (1) year from the date of shipment by CAFP (*the “Warranty Period”*), CAFP will, upon substantiation of such failure and at its sole option, either repair or replace the Finish. Anodizing is an electro-chemical process resulting in a colored aluminum oxide layer on the flagpole surface. Color variation will inherently occur between the tube (*Alloy 6063-T6*), castings (*Alloy 356*) and weld metal (*Alloy 4043*). Minute differences in the surface properties of the tube caused by fabrication processes such as tapering can also result in slight color variation of anodized finishes. These variations are more pronounced in light and medium color anodizing. These color variations in anodized finishes are not defects or failures and are not covered by the Warranty.

Specifically excluded from the Warranty is the cost to remove, ship, or reinstall the flagpole with the Finish. Repair or replacement by CAFP is the Buyer’s sole remedy, and CAFP’s sole obligation, in the event of a failure to conform to the Warranty. The Warranty does not cover defects or failures resulting from improper installation or maintenance, misuse, abuse, radiation, overloading, use of caustic cleaning agents, accident, acts of God or other casualty beyond the control of CAFP.
